

MARIAH ANDERSON

SR. PRODUCT ENGINEER | AI ENABLEMENT & GOVERNANCE LEAD

mariah.c.anderson@gmail.com · linkedin.com/in/mariahanderson · mariahtheoptimist.framer.website · github.com/em-cee-ayy

PROFESSIONAL SUMMARY

Product engineer and AI builder with a foundation in psychology, UX, and full-stack development, who enjoys translating behavioral data systems into product strategy. Co-leads SOCI's company-wide AI enablement program and co-built LMS operationalizing responsible AI use. Recognized by peers for AI-native, cross-functional impact. Independently shipped a 4-product portfolio proving 1 thesis at 4 layers - interface, environment, design system, governance: cognitive state as a first-class product input. Building toward AI-native product leadership.

EDUCATION

B.S. Psychology

Western Connecticut State University · 2017

UX / UI Design Certification

Florida Atlantic University · 2022

Google Cybersecurity + AI Certificates

Coursera · completing 2026

M.S. Digital Marketing

Southern New Hampshire University · expected 2028

RELEVANT EXPERIENCE

Senior Product Engineer - SOCI | 2022 - Present

- Designed and lead SOCI's company-wide AI enablement program - Claude training delivered alongside VPs and the CTO, translating model capabilities into role-specific workflows for engineering, product, support, and revenue teams
- Co-built an ISO 42001-aligned internal LMS with Governance & Security - use-case documentation, approval workflows, and security-literacy-first training (CIA triad, data classification, prompt-injection awareness)
- Built an internal Slack-integrated RAG assistant: scoped retrieval, source-cited answers, zero-trust boundaries between the AI layer and knowledge base, prompt-injection guardrails
- Recognized by the CTO, VP of IT, VP of Customer Success, and Director of CS for AI-native instincts and cross-functional impact
- Diagnosed systemic product gaps from large behavioral datasets - interaction signals, API event logs, support trends - driving fixes that cut resolution time in half
- Led cross-functional gap analysis across Product, Engineering, and Design; technical liaison translating system-level insights into product requirements and architectural recommendations
- Mentored and onboarded new hires, establishing technical workflows and product collaboration standards

Account Manager - eLocal | 2021 - 2022

- Analyzed client performance data to improve retention and outcomes

Customer Success Manager - Charity Footprints | 2020 - 2021

- Managed 100+ client accounts and led onboarding demos to increase platform adoption

PROJECTS

Independent Portfolio | 2025 - Present

- **BrainMode (interface layer)** - cognitive state router: 6-state Claude classifier with strict JSON output contracts; adaptive UI system across 3 viewports. Next.js · Supabase · Anthropic API
- **Happy Trails AI (environment layer)** - trail matching built on Attention Restoration Theory (ART): RAG pipeline with a 4-dimension scoring model and closed feedback loop. FastAPI · Pinecone · Mapbox
- **ABRC (design-system layer)** - live neuro-informed design system: every design decision published with a research citation; live Claude-powered tools
- **The Phantom PRD (governance layer)** - published AI PM strategy for Character.AI: behavioral teardown, feature spec with a "won't-ship" list, evidence-gated 12-month roadmap, behavioral-health metrics framework
- **AI Governance Framework (healthtech SaaS)** - risk-tiered approvals gating CI/CD, compliance-as-code (ai-manifest.json), feature spec with compliance as acceptance criteria. NIST AI RMF · ISO 42001 · EU AI Act

Flux - AI Behavioral Productivity System | 2025 - Present

- Built an AI app integrating behavioral signal processing and user state modeling (React · Firebase · OpenAI); evolved into the Anthropic-native BrainMode, reusing its sentiment-analysis and reasoning-transparency primitives
